

M1 is a customisable solution for medium-sized hybrid and configure-to-order manufacturers who need an all-in-one business management solution. It provides complete business visibility and helps in reducing costs while increasing productivity. Real-time visibility allows for more accurate scheduling and material ordering, and costly data entry errors are lessened because of the single point of entry that can be sourced throughout the system.

M1 is available through two subscription options: 24/7 access through a cloud-based platform or on-premise-based for organisations needing to meet stringent regulatory requirements.

For more than 15 years, M1 ERP has met the rapidly changing needs of our customers by focusing on their entire sales, production and financial processes. Our M1 ERP software solution targets inefficiencies, controls job costs and maximizes the contribution of company resources.

**Multi-national/company coverage** > Multi-currency, Multi-company
